Imagine a drawer full of items that you have no use for, but you won't throw away!

Instead of taking up space in a jewelry box, these items could be earning you some extra CASH!

This is how it works:

Most people have an average of about 50 to 100 Grams of Gold sitting in a drawer or jewelry box.

This could be *broken chains, mismatched earrings, unwanted items, old jewelry, etc.*

The Gold Is Sorted Based On Quality (ie. 24k, 18k, 14k...)

Your Gold Is weighed

You're given an offer you can accept or decline right there
